

## JTC June Meeting: Transport

### Day 1: Information Sharing – Tom Johnson House

The first day of the Commission's exploration of transport will aim to provide an overview of the systemic changes required, existing commitments and future plans, and progress that has already been made in the transport sector in terms of a just transition. .

Since Climate Action Plan 2023, D/Transport have adopted the **Avoid-Shift-Improve Framework** to approach reducing emissions.

- **Avoid** measures include consideration of spatial and planning policy and measures to reduce transport demand.
- **Shift** measures include encouraging a behaviour shift towards using sustainable travel modes, including public transport and active travel.
- **Improve** measures include the transition to EVs and higher penetration of biofuels in the fuel mix.

The Commission will receive presentations from policymakers and relevant agencies. Academic contributions will then reflect on the concepts of liveable communities and transport poverty. .

### Day 2: WayFinding Centre: Listening to the Lived Experience

This second day of the Commission's deep-dive will focus on the impact of the transition to sustainable transport on people and communities in Ireland. Commissioners will have the opportunity to tour [the Wayfinding Centre](#) in the morning. The afternoon will explore what a just transition in the transport sector should look like with relevant stakeholders guided by an external facilitator.

DAY 1				
Time	Topic	Speaker	To be covered in presentation	Briefing note provided before meeting
9 am	Coffee / Tea
